

Yes, here is your access pass

Subject: **your access pass for the underground waste containers**

Dear Sir, Madam,

Yes, you can now use the underground waste containers in your neighbourhood. The existing indoor and/or containers above ground will be removed. Please find enclosed your access pass with which you can open the waste container for residual waste. The other underground containers can be opened without the use of a pass. In this letter you will read how to use the pass. And tips to help you separate your other waste.

Using the underground waste containers for residual waste

We informed you about the location of the nearest underground waste container for residual waste in a previous letter. You can check this location again on the map at www.haarlemmermeer.nl/containerlocaties. To dispose of your residual waste, you need to bring your pass. Place the pass on the card reader (1). You will hear a click (2). You can now open the lid and dispose of your waste (3). Waste disposal bags with a maximum of 30 litres will fit in the opening. Please make sure to close the lid after use (4). See the pictures with corresponding numbers below.

Attention! Do not make holes in the pass. This damages the chip, which results in an unusable pass.

(1) Bied uw pas voor 3 seconden aan op de scanner.

(2) Open de deksel nadat u een klinkgeluid hoort.

(3) Bied uw afval aan in de vrijgekomen ruimte.

(4) Sluit de deksel volledig. U kunt nu weglopen.

You can now separate your waste more easily

We have also placed containers for organic and garden waste, paper waste, glass, textile and for plastic, drink cartons and cans in your neighbourhood. Meerlanden will make sure that your recyclable waste is reused in new products. You can find the location of all the different containers via afvalkalender.meerlanden.nl. Or in the Meerlandenapp for your mobile phone. You can recognize the recycling containers by the following stickers.

Waste that is too large to fit these containers is bulky waste

Examples of bulky waste are old furniture, oversized boxes, mirrors or mattresses. Items such as these can be taken to the Meerlanden waste station. You can take up to 3 cubic meters per year for free. You can also ask Meerlanden to pick up your bulky waste. You can have up to 2 cubic meters per year picked up for free. More information can be found at www.haarlemmermeer.nl/grofvuil.

Do you have doubts about what waste goes where?

We understand that separating your waste might be difficult at first. Enclosed with your Dutch letter you will find the waste separation flyer to help you out. You can also find this information online at afvalkalender.meerlanden.nl, in the Meerlandenapp or by scanning the QR-code on the containers.

Please contact us if your pass is broken, stolen or missing

You can get in touch with Meerlanden Public Information via 0297-381 717 or pi@meerlanden.nl. We can be reached from Monday till Friday 8.30AM till 4.30 PM. Ordering a new pass will cost you €15. Do you have questions about waste separation, or would you like to receive tips to do so better? Please send an e-mail to grondstofcoach@meerlanden.nl.

Kind regards,

On behalf of Meerlanden,

Manager Public Information

On behalf of Haarlemmermeer municipality,

Paul Heuberger
Area manager

Ja, afval scheiden
daar maken we iets moois van

 **Meerlanden**
